

# Batch Analysis Report

15 compounds — Generated on September 05, 2026 at 03:35 UTC

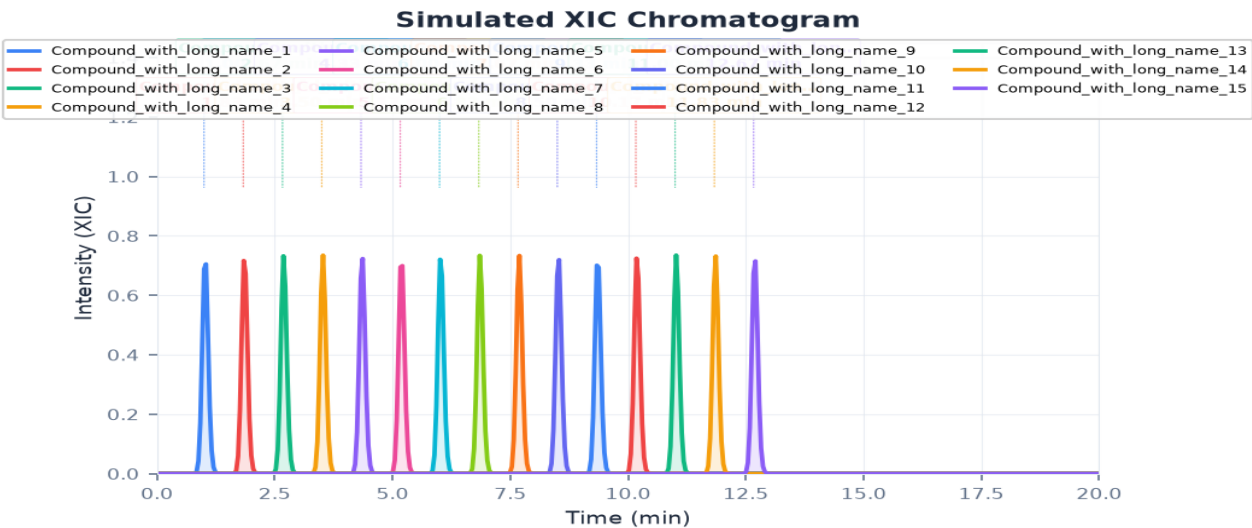

## Method Parameters

| Parameter      | Value      | Parameter      | Value |
|----------------|------------|----------------|-------|
| Column Type    | C18        | pH             | 2.7   |
| Flow Rate      | 0.4 mL/min | Temp           | 30 °C |
| Mobile Phase A | —          | Mobile Phase B | —     |
| Additive       | —          |                |       |

## Compound Results

| #  | Name/SMILES                | RT (min) | Width (s) | Status          |
|----|----------------------------|----------|-----------|-----------------|
| 1  | Compound_with_long_name_1  | 1.00     | 8.0       | Co-elution risk |
| 2  | Compound_with_long_name_2  | 1.83     | 8.0       | OK              |
| 3  | Compound_with_long_name_3  | 2.67     | 8.0       | OK              |
| 4  | Compound_with_long_name_4  | 3.50     | 8.0       | Co-elution risk |
| 5  | Compound_with_long_name_5  | 4.33     | 8.0       | OK              |
| 6  | Compound_with_long_name_6  | 5.17     | 8.0       | OK              |
| 7  | Compound_with_long_name_7  | 6.00     | 8.0       | Co-elution risk |
| 8  | Compound_with_long_name_8  | 6.83     | 8.0       | OK              |
| 9  | Compound_with_long_name_9  | 7.67     | 8.0       | OK              |
| 10 | Compound_with_long_name_10 | 8.50     | 8.0       | Co-elution risk |
| 11 | Compound_with_long_name_11 | 9.33     | 8.0       | OK              |
| 12 | Compound_with_long_name_12 | 10.17    | 8.0       | OK              |
| 13 | Compound_with_long_name_13 | 11.00    | 8.0       | Co-elution risk |
| 14 | Compound_with_long_name_14 | 11.83    | 8.0       | OK              |
| 15 | Compound_with_long_name_15 | 12.67    | 8.0       | OK              |

## Simulated Chromatogram

Flagged Compounds

| # | Name/SMILES                | RT (min) | Issue           |
|---|----------------------------|----------|-----------------|
| 1 | Compound_with_long_name_1  | 1.00     | Co-elution risk |
| 2 | Compound_with_long_name_4  | 3.50     | Co-elution risk |
| 3 | Compound_with_long_name_7  | 6.00     | Co-elution risk |
| 4 | Compound_with_long_name_10 | 8.50     | Co-elution risk |
| 5 | Compound_with_long_name_13 | 11.00    | Co-elution risk |

Disclaimer

Batch analysis predictions are estimates derived from physicochemical heuristics and statistical models. They require experimental verification before use in regulated or production analytical work.
